**Love is the greatest healer.**

**Love Remedies** are a new generation of vibrational essences that have been extracted using the Stepanovs Method from living flowers. With this method the plants no longer need to be sacrificed for the benefit of mankind.

Every person at some stage experiences an emotional imbalance that can block their spiritual growth. In the long-term, these imbalances can develop into an illness. Flower essences dissolve mental, emotional and spiritual limitations.

Awakening to the inner self with flower essences can create insight to your innate wisdom, life purpose and to revive self-love and to reconnect with nature.

A real cure of every illness occurs only when emotional balance is restored. Every plant offers a unique, powerful, yet gentle method of working effectively with emotional challenges (e.g. fear, anger, resentment, envy or jealousy etc.) and deeper personal life issues that can trigger certain signals in the brain.
